INTRODUCTION

The Australian Bureau of Statistics is the official statistical organisation for the Federal and State Governments. Its main function is to collect facts from a wide variety of social and economic areas, compile and disseminate them to interested users both within Government and the community in general.

The ABS publishes a total of 2730 statistical bulletins—either monthly, quarterly, half-yearly or annually under 1030 different titles.

How To Use This Catalogue

This first edition of the ABS catalogue contains currently available statistical publications released by the ABS State Offices and its Central Office in Canberra. The catalogue is divided into two parts—A and B.

Part A lists all publications in numerical order. A brief description is given for each Central Office publication. Please note that most publications issued by Central Office contain particulars for each State and Territory as components of Australian totals. Descriptions of individual State Office publications will be added to the next edition of the catalogue.

Part B contains a detailed subject index of all Central Office publications in alphabetical order. A subject index of State Office publications will be included in the next issue. If you are interested in a particular subject area, e.g. overseas trade, employment, etc. you will find it convenient to identify the range of publications from the list of subject groupings on pages 7-8 and therefore to all publications within that subject. If you have a specific interest, e.g. the production of butter and cheese, or industrial disputes, check the detailed subject index beginning on page 107.

PART B—SUBJECT INDEX TO CENTRAL OFFICE PUBLICATIONS

This index is designed to assist users in determining which Central Office publications are relevant to various subjects. *The index is not intended as a comprehensive index of commodities or items covered in the statistics. For example, particular items of production and overseas trade are largely omitted.*

The publication *Manufacturing Commodities, Principal Articles Produced* (8303.0) contains a detailed alphabetical index of commodities produced in Australia.

Detailed export and import statistics are shown in the following publications: *Australian Exports, Country by Commodity* (5411.0), *Imports Cleared for Home Consumption* (5412.0, 5413.0), *Australian Imports, Country by Commodity* (5414.0) and *Overseas Trade* (5409.0).

No references are given in this index for the *Official Year Book of Australia* (1301.0) and the *Pocket Compendium of Australian Statistics* (1302.0) as each of these publications contains a detailed index. The Year Book should be regarded as the principal general statistical reference work produced by the Central Office of ABS. No references are given to the Northern Territory and Australian Capital Territory statistical summaries, which contain a comprehensive range of statistics for these territories, or to the folder *Australia at a Glance* (1309.0), which gives a brief statistical summary for Australia.

Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by bold type.

New publications or changes in publications released after 30 April 1977 are not included in this index. Titles of bulletins issued during the subsequent months are published in 1102.0.
